Ask the students to form a circle holding hands. First, have them practice squeezing their left hands and then their right hands. One child will begin by quickly squeezing the hand of the child to his or her right, who will pass the signal on to the next child, and so on, until it returns to the first child. The children should be timed and challenged to go faster and faster. Once they have learned this basic Mutambo, you can ask them to send the pulse in the opposite direction or to increase the number of squeezes per pulse. It brings happiness to you

Your brother doesn't understand
But you've explained it more than twice
You really ought to try again
And do your best to be nice
No sense gettin' impatient
It's useless to be stern
If you show him kindness
It's the way to help him learn

Chorus

You want to do much better
But still you don't succeed
You wonder why make an effort
And where it all will lead
No sense gettin' impatient
It's silly to do less
If you keep on striving
You'll eventually progress
